

## *Software: Why will some files in the monitoring folder not be burned to discs?*

### **Recommendation:**

Go to **Preferences > Folder**, uncheck the "Ignore files already existing in the folder" field. QQcatcher will then not burn those files already existed in the monitoring folder before it starts monitoring.

In addition, QQcatcher will not burn files that exceed the capacity of a disc. Any file that exceeds the disc capacity will remain in the monitoring folder without being burned to disc.

For example, if the type of disc is selected as CD (650MB), any file that exceeds 650MB will be skipped. Likewise, if the type of selected disc is DVD (4418MB), any file that exceeds 4,418MB will be skipped.
