QQcatcher: Will QQcatcher start to work as soon as it is launched?

Recommendation:

QQcatcher will start the monitoring and disc burning jobs in 30 seconds after it is opened.

If you would like to pause QQcatcher or change its settings, press both the â€œPause Monitoringâ€• or â€œPause Writingâ€• button to stop the countdown.

After you have set up the preferences, start burning or monitoring job by pressing the corresponding button.
