Software: Why does QQcatcher pop up a window asking whether to continue the process?

Recommendation:

Make sure the â€œDisc Typeâ€• setting (**File** -> **Preferences** -> **Burning**) matches the discs loaded to the autoloader. QQcatcher will not burn discs if the type is different.

The different discs will be recognized as bad discs. If 3 bad discs in a row were identified, QQcatcher will pop up a window asking whether to continue the process, so that you may reload the autoloader with the correct type of discs or quit the job.
